

LA SIMETRÍA DEL ESPEJO

LEFT-RIGHT

When you look at yourself in the mirror you see your reflected image. Your image and you are almost equal, there is only a difference: right and left are changed in the image (the right ear of your image is in fact your left ear).

Try it!

Hold your left ear with your right hand and place yourself opposite a mirror. You will see that in your image, it is the left hand the one that is holding the right ear.

YOU WILL NEED:

A mirror
