

PLAYING

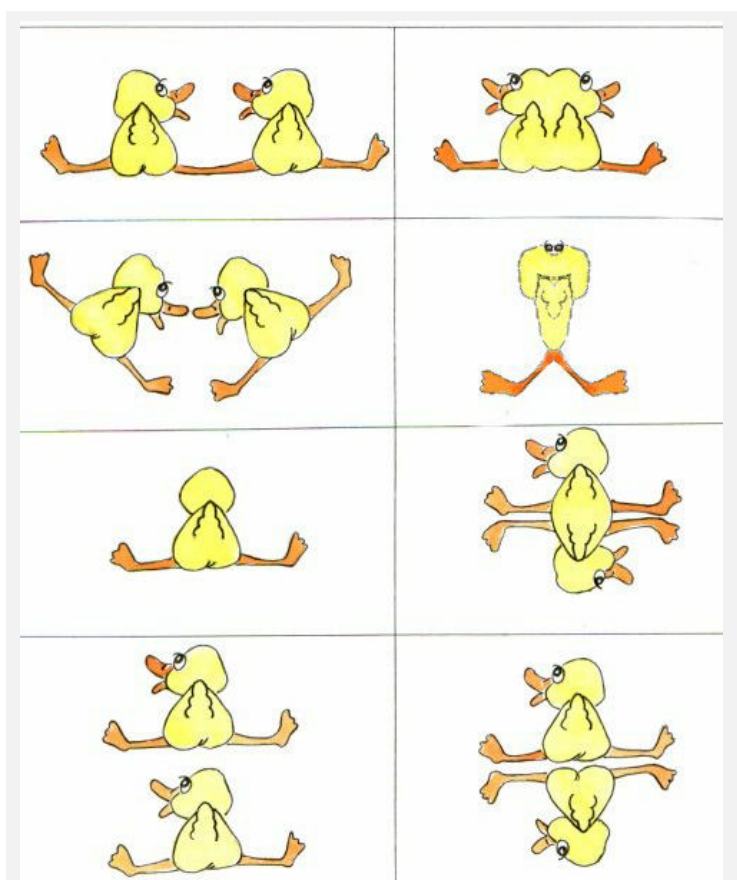

WITH

SYMMETRIES

Take a good look at the figure in the box you are going to use as a pattern in the activity:

Placing the mirror in the suitable place of this pattern, you are going to try to obtain each of the following figures: the visible part of the pattern and its reflection in the mirror must allow you to see each of the figures. But be careful; some, perhaps cannot be reproduced; and others, that they can, will not necessarily be seen in the position they are drawn.

YOU WILL NEED: a mirror
