

## THE GAME OF THE MIRROR

- ✎✎ **Take any card.** Analyze, considering its symmetry, the position that would allow to reproduce it in a mirror from its half.
- ✎✎ **Which pair of counters** will you have to place opposite the mirror and **in which position** so that, with the two counters you have placed opposite the mirror and their reflection, the card you have previously chosen can be seen?

### YOU WILL NEED:

A game (cards, counters and a mirror with a base).
