

## TANGRAM-1

The **tangram** is a **puzzle of Chinese origin** that is made up of seven pieces: two big triangles, a medium triangle, two small triangles, a square and a parallelogram. Next, you can see all the pieces drawn:

The aim of the tangram is to create certain geometric figures: a square, a rectangle, a triangle or anything. But, also figures of objects and living beings can be constructed, like people running, seated, dancing... Or animals like fish, cats, dogs, pigs... Or other things, like boats, houses, spears, ...

{ Next you can see drawn two figures. Pay attention to its shape: you must be able to construct them only using them, for each one, the square, both small triangles and the medium triangle of the tangram:
